

>>> High Definition Weather

High Definition Weather Around the World

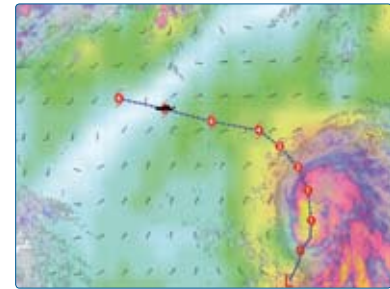

ClearPoint High Definition Weather™ offers comprehensive, continuous global weather information service to captains, racers, cruisers and fishermen, as well as marinas and coastal resorts. Real-time and location-specific, ClearPoint shows the prevailing conditions at your location, tracks your craft, and automatically sends alerts for your changing position. Featuring the most advanced predictive technology, ClearPoint allows you to anticipate changes in weather conditions as you chart your course — up to five days in advance. We offer a range of specialized subscription services with thousands of weather data combinations bringing safety and predictability to your world on the water — anywhere across the globe.

ClearPoint features & benefits

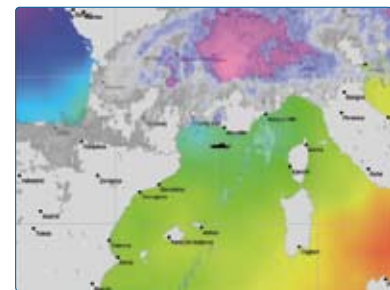

- > **Comprehensive** You can see detailed, “always on,” real-time and predictive data on key marine applications including winds, waves, fronts, visibility, clouds, lightning, tropical storms, bulletins, alerts, and more.
- > **Resolution** With ClearPoint’s powerful, weather modeling technology, you can rely on data up to ten times the resolution of conventional weather software. Our Racing Edition™ offers ultra high resolution wind data at one nautical mile and one hour intervals for the most accurate wind forecasting system in the marketplace.
- > **Range** ClearPoint has a truly global footprint, covering seven continents, both poles, and the seven seas. That means you can take advantage of our services whether you’re traveling around the world or across the bay.
- > **Easy to Use** ClearPoint’s intuitive, graphical interface delivers complex data in easy-to-read displays accessible on laptops, tablets, and other PC-based systems.
- > **Compatible** ClearPoint’s services are accessible over multiple transmission technologies, from broadband to satellite to WiFi — anywhere in the world.
- > **Support** Our experienced team members are ready to support you whether you are located in the Americas, Asia-Pacific, Europe, Middle East or Africa.

Designed to meet your needs

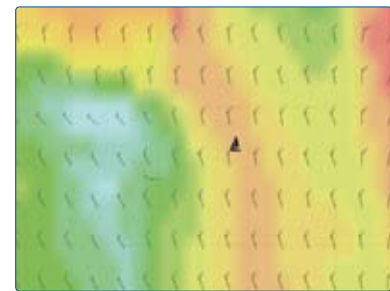

- ClearPoint offers a range of specialized subscription services allowing you to tailor your subscription to meet your specific needs.
- > **ClearPoint Basic Edition™** Our basic service offers eight mission-critical applications for sailors, captains, and recreational boaters including winds, waves, radar, fronts, satellite, currents, point forecasts, and bulletins.
 - > **ClearPoint High Definition Weather Edition™** Our core service aggregates and delivers all the weather information you need to navigate with confidence. ClearPoint shows precise weather data and forecasts in a single, integrated view, with easy-to-use touch-screen icons and user controls.
 - > **ClearPoint Racing Edition™** Optimized for the most competitive venues, ClearPoint Racing offers ultra high resolution wind models at 1nm, 5nm and 15nm resolutions. Plus, you receive all the benefits of our core weather service including direct access to location-specific fronts, currents, radar and satellite data.
 - > **ClearPoint Sport Fishing Edition™** Developed specifically for avid fishermen, ClearPoint Sport Fishing delivers advanced weather, sea surface temperature, currents, bathymetry/altimetry and chlorophyll data that determines the presence of bait and fish and measures the presence of algae, a source of food for most marine life.
 - > **ClearPoint Premium Edition™** Our all-in-one premium service is perfect for racers, anglers and cruisers as well as marinas and resorts seeking to expand their services or enhance their charter sailing and fishing expeditions and other watersport offerings.

>> WIND/SATELLITE/TROPICAL STORM

>> SEA TEMPERATURE/SATELLITE

>> WIND, 1nm RESOLUTION
